

## Company Policy to set the Buy / Sell limits for Individual Clients

Management of India Advantage Securities Pvt. Ltd. Has formed a uniform Individual client limit setting policy. The Risk Management Department is responsible to implement the said policy.

For new clients after following the due process of KYC, client has to deposit margin amount with the Company either through Funds or through Securities in Companies designated Bank accounts or the Demat account as the case may be. The securities are taken into consideration after applying the exchange defined hair cut in each of the securities received as margin.

For existing clients the end of the day ledger balance and the stock available in the DP is considered for limit setting and the same has been uploaded in the system through our Risk Management soft ware.

All the terminals are checked daily for the upper limits set through system and if any modification is required for one time modification, then the same has been set manuali.

Further we are reporting the same to all the exchanges every quarter as per compliance requirement.
